

Important guidelines for writing the SRS

- The maximum number of members per group is six.
- Select a system which can implement in the real environment (ex: Medical Inventory Systems, Library Management System, Learning Management System, etc).
- Remember that you are writing a professional as well as a technical document. So do not make it a “fancy document”.
- Use the cover page given in “SRS Cover Page.docx”. Remove the lines in the blue color font and insert your project details to those lines. Do not alter the lines in black color. The complete page needs to be in “BLACK” color.
- Use “Times New Roman” font. The main text (body text) must be in 12 pts. Use suitable sizes for headings (You can use the default sizes given in the SRS Template.docx”. Line spacing for the main text must be 1.5.
- All pages except the cover page must be numbered, and the number must appear on the lower right hand corner of the page.
- Number every image and data table and refer to them in the main text using the numbers.
- The maximum number of pages excluding the appendices must be 50.

NOTE:

- Following the guidelines, templates and standards are important, note that marks will get deducted otherwise.
- Implementing requirement-gathering techniques will add more credits to the assignments.
- You can attach the documents (Ex: questionnaires) that you used for the above techniques in the appendix of the document.
